SCHOLARLY ESSAY SEARCH ENGINE

Academic Index:This scholarly search engine and web directory was created just including free and open access full-text articles, papers, and dissertations.

In the future I will probably create another list that focuses more on economic data and statistics. It offers a huge range of topics within multidisciplinary scientific areas of study. This search engine is aimed at scholars in general as its name indicates. Researching is the most crucial step of writing a scientific paper. Developed by Microsoft Research, it has more than 48 millions publications written by over 20 millions authors. This content management system is not a search engine. You can find plenty of articles and academic publications using this platform. It is a one-stop platform that offers everything related to academic publications such as chapters, conference papers, reports and presentations. The journal gives free access to over institutions all over the world. Material coverage is focused on education research materials and the tool is aimed at individuals with an interest in education practices and researchers in education. Note that "free" or "subscription" can refer both to the availability of the database or of the journal articles included. All the journals are thoroughly peer-reviewed. This academic database is particularly helpful for students seeking information on computer and information sciences. The ultimate objective of the SEO process is to get a webpage ranked within the first ones listed on the search results page. The academic directory is totally free of cost and provides easy and simple access to plethora of information covering scientific subject-matters. I picked a few of my favourite free Search Engines and Reference Works for research, and listed them in alphabetic order below. This curated knowledge showcased within the LibGuides provides students and researchers valid information for academic research. It has brought in many new ways to search academic resources, such as papers, authors, conferences and journals. The directory offers a huge range of topics within scientific areas of study. They provide a one-stop solution to all research-related needs for a scientific paper. This has been indicated as precisely as possible in the lists below. From one place, one can search across many disciplines and sources: articles, theses, books, abstracts and court opinions, from academic publishers, professional societies, online repositories, universities and other web sites. It provides free access to peer-reviewed journals from third world countries. At first , the engine was focused on scientific data algebra and statistic , today the curated data are also gathered from academic, governmental and commercial websites. Published By. Established in to cover the arts and humanities, it has since expanded its scope and now also covers selected university full text repositories and many additional ejournals in science, biomedical, ecology, business and law. They offer information on possibly all the major areas of science including computer and technology, biology, environmental science and social sciences, and other areas of academic research. However, by consulting the user community webpage you may gain access to thousands of tips and lists of the best academic references.
